Professional Summary

Senior Software Engineer / Tech Lead with more than 7 years of experience in backend development and cloud architecture, primarily working with TypeScript (Node.js/NestJS) and Java (Spring).

Strong focus on scalable microservices, AWS-based infrastructure, CI/CD and cost optimization, leading backend teams and owning end-to-end delivery.

Professional Experience

The Phone House Spain, S.L. (Dominion Group) - Senior Backend Engineer

Sep 2025 - Aug 2026

- Designed and developed a new architecture based on Java microservices.
- Designed and developed an internal ticket management application.
- Technologies: Spring, Java, PostgreSQL/MariaDB, AWS, Terraform, Docker.

Key achievements

- Replaced an external ticketing tool, saving more than 100 licenses per year.

The Telecom Boutique, S.L. (Dominion Group) - Senior Backend Engineer / Tech Lead

Sep 2021 - Sep 2025

- Led a team of 5 developers.
- Led the migration of more than 2,500 JavaScript lambdas to a TypeScript microservices architecture based on hexagonal principles.
- Implemented engineering best practices, CI/CD pipelines and testing, while improving deployment workflows.
- Designed technical solutions, managed the backlog and conducted code reviews.
- Coordinated with infrastructure teams, vendors and client technical teams.
- Technologies: NestJS, TypeScript, JavaScript, RabbitMQ, PostgreSQL/MariaDB, AWS, Terraform, Docker.

Key achievements

- Reduced AWS costs from EUR 40,000/month to less than EUR 10,000/month.
- Developed a document generation service (Puppeteer + Handlebars) optimized for high-volume PDF generation, processing more than 60,000 documents per day, including invoices and contracts.
- Successfully completed an architecture migration to scalable microservices.

Esker Ibérica, S.L. - Software Engineer

Aug 2020 - Sep 2021

- Developed document automation tools for invoices and receipts using OCR engines and neural networks.
- Developed backend services with JavaScript on Azure.
- Collaborated continuously with international teams.

HP Printing and Computing Solutions S.L.U. (University of Leon and Barcelona) - Full Stack Developer

Oct 2019 - Jul 2020

- Sole developer of a real-time application for managing network-connected equipment.
- Owned the full application lifecycle, from requirements gathering through deployment and maintenance.
- Technologies: Vue, JavaScript, Node.js, Express, Socket.io, MongoDB.

Silver Storm Solutions, S.L. - Software Engineer (Internship + Junior Contract)

Apr 2018 - Sep 2019

- Developed a cloud CRM using Angular, JavaScript and MariaDB.
- Implemented integrations with Jira, SharePoint and similar platforms.

Personal Projects

- **Nupzi**, founder - www.nupzi.com (a platform for creating and managing customizable wedding websites).
- Astro + Fastify + MongoDB.
- Features: digital invitations, RSVP forms, reminders and image galleries.

Technical Skills

- **Backend / Cloud:** Spring, Java, Node.js, JavaScript, TypeScript, NestJS, Fastify, AWS, Terraform, Docker, RabbitMQ.
- **Databases:** PostgreSQL, MariaDB, MongoDB.
- **Frontend:** Angular, Vue, React.
- **Other:** Git, CI/CD, Scrum, Kanban.

Education

Graduate in Computer Engineering

Specialized in Software Engineering.

University of Valladolid (Spain).

Languages

- **Spanish:** Native.
- **English:** Professional working proficiency (B2/C1).
